## BUREAU CHIEF

COMING SOON

Rear Admiral H. R. Stanford, chief of the Bureau of Yards and Docks, and as such the head of all work at Pearl Harbor, will sail from San Francisco July 23 for this city, where he will remain for two weeks. Word to this effect has just been received by Civil Engineer Gayler, in charge of Pearl Harbor work, in a personal letter from the bureau chief.

During his stay here Admiral Stanford will make a thorough investigation of conditions at Uncle Sam's mid-Pacific naval base, and will inspect all work completed or in course of construction. Navy men here believe that the visit will be of immense advantage to Hawaii, as it will show existing conditions and needs as no amount of written report could show them.

A careful measurement of the rainfall at the Pearl Harbor naval reservation, kept for the last ten months, brings to light the fact that the station is one of the most arid on Oahu. In ten months only 11.8 inches of rain has fallen, an annual precipitation at the rate of 14.2 inches for the twelve months. All cultivation of shade trees, lawns, and ornamental shrubbery will have to be by irrigation, and an adequate watering and sprinkling system is included in the plans for the finished station. A tree nursery was established about a year and a half ago, and there are a large number of well grown shade trees now ready for transplanting.

How much people are willing to take for granted, if it's needed to make up the story they want to hear.

## CUBAN REVOLT

LEADER SLAIN

WASHINGTON, D. C., June 28.—Confirmation of the death of General Estenoz, the Cuban rebel chief, has been received by the Department of State and it is believed in Administration circles that the negro revolt is practically over and that there will be no further disturbances. The dispatch to the State Department from the Legation at Havana stated that General Montenegro had reported that the government forces had killed Estenoz near Sonogo, while the Consul at Santiago telegraphed that the rebel leader was slain yesterday noon in a battle at Micara, which is between La Maya and Mayari. It was also reported that 150 rebels had been killed. Reports from Cabaigen, Antilla, Baracoa and Cienfuegos were that those districts were quiet.

Information from Mexico today also indicated that the end of the revolution in that republic was near. The Consul at Salina Cruz reported there had been less lawlessness there and a similar message came from the Consul at Ensenada. Consul Dye at Nogales reported that there were no disturbances in his district.

The town of Aarau, Switzerland, has just opened a \$30,000 crematorium. The festivities in connection with its opening lasted all night and were participated in by the entire town.

Major Eli H. Janney, inventor and field quartermaster on the staff of General Robert E. Lee during the Civil War, died at Alexandria, Virginia.

Massachusetts has set as the \$5,000,000 for the construction of state highways.

## HAWAII ENGINEER'S ACCOUNTS HELD UP

[Special Correspondence, Star-Bulletin.]

HILO, July 8.—At the meeting of the supervisors held last week the finance committee which reported back last Saturday held up a number of County Engineer E. A. Southworth's travelling expense accounts. The accounts, it is maintained, show that while Southworth is provided with a rig by the county he has been in the habit of taking hacks when going to and from the wharf and has also been hiring automobiles from the various garages when going on special trips, instead of travelling in his rig.

The accounts were held up in the ordinary way and will come up for further discussion at the special meeting of the supervisors to be held on July 15 when the appropriations will be discussed and settled.

## Life Insurance.

Life insurance organizations of the United States and Canada distributed \$592,640,000 in 1911, according to computations by The Insurance Press. The payments in the two countries to beneficiaries for death claims, matured endowments and other benefits under the policies of level-premium companies and the certificates of various life insurance organizations—assessment and the like—amounted to \$401,140,000. The estimated total of the amounts paid by regular companies in dividends to policyholders, for surrender values, to annuitants, and on claims in foreign countries was \$191,500,000.

Summation of life insurance payments of all kinds in the United States and Canada \$401,140,000. Claims paid in the United States and Canada \$191,500,000. Payments for dividends and for surrender values to annuitants and foreign policyholders (estimated) 191,500,000.

Grand Total \$592,640,000

All Benefits Increased.  
All benefits under policies—death claims, endowments, dividends—in the transactions of regular life insurance companies, increased in 1911. The amount of insurance written and received, by the regular companies alone, was nearly \$3,000,000,000, or about \$400,000,000 more than in 1910.

The Royal Scottish Geographical Society of Great Britain has decided to award the Livingstone medal to Roald Amundsen for his recent geographical discoveries in the antarctic regions.

A church in upper Broadway, New York City, has made a play garden of its churchyard, and invites the mothers and children of the neighborhood to make themselves happy in it.

## BY AUTHORITY

NOTICE TO CONTRACTORS.

Sealed proposals will be received at the office of the Hawaii Loan Fund Commission, Room 6, Bank Building, Hilo, Hawaii, until 1 o'clock in the afternoon of August 1, 1912, for the improvement of the following sections of the Belt Road in the County of Hawaii: Contract No. 2—Hakalau Gulch to Pohakupuka Gulch, length 5.58 miles, District of North Hilo. Contract No. 3—Kaawili Gulch to Kealakaha Gulch, length 4.65 miles, District of North Hilo and Hamakua. Contract No. 4—Kahuku Lava Flow, length 2.11 miles, District of Kauai. Proposals shall be on forms furnished by the Commission. Each proposal shall specify the gross sum for which the work will be performed according to the plans and specifications, together with a unit price for each of the separate items as called for.

Proposals shall be in a sealed envelope, addressed to Albert Horner, Chairman, Hawaii Loan Fund Commission, County of Hawaii, and plainly endorsed as required in the specifications under "Notice to Contractors," page 1. All proposals shall be accompanied by a certified check as provided for in the specifications for a sum equal to 5 per cent. of the amount of the proposal.

The Commission reserves the right to reject any and all bids and waive any defects. Plans may be seen and specifications and proposal forms can be obtained on application to the Engineers' Office, Room 6, Bank Building, Hilo, Hawaii, on and after July 8, 1912.

ALBERT HORNER, Chairman, Hawaii Loan Fund Commission. 5283-104

## CONVENTIONS PLEASE CLEWS

Henry Clews of New York, in his special letter of June 29, takes the following cheerful view of the outcome of both the presidential nominating conventions:

"The result of last week's Republican convention was a decided setback to extreme radicalism, and this week the Democratic convention has acted likewise. It does not mean that as between conservatism and progressivism the latter has been defeated. On the contrary, it means that not a few of the reforms desired by the people are shortly to be granted by one party or the other, since each party has striking features of resemblance and each is outbidding the other in the race to catch votes.

"If the conventions held within the last two weeks mean anything, they mean that reforms are to come by evolution and not by revolution. Political leaders recognize that important changes are coming; changes that will benefit the masses and consequently the nation. And they must also recognize that these changes should be made gradually; that a sudden or violent disruption of established institutions and methods would throw our industrial system into chaos to the injury of all and the benefit of none.

"Happily the two conventions have materially cleared the political atmosphere. While the actual results of the election can not yet be foretold with certainty, the encouraging fact remains that extreme radicalism has received a conspicuous check in both parties and that the sober second thought of the American people is averse to what would appear to be revolutionary proposals.

"An important danger has thus been removed from business calculations. Those at the head of industrial and commercial affairs will be able to formulate plans for the future with renewed confidence, and as a result we may expect a steady improvement in business from now on, unless there should be an unexpected disaster to the crops."

## PLAGUE RATS ARE FEARED

With one of the largest cargoes of coal ever brought to the Hawaiian Islands, the British freighter Kalibia, from Japan, was boarded by Dr. James, representing the United States Public Health and Marine Hospital Service, off the harbor this morning, and soon after the steamer was ordered alongside the quarantine wharf.

The Kalibia in command of Captain John Stewart, is said to have come from an infested port, before taking on the big supply of fuel at Moji, Japan.

According to Dr. Trotter, ordered the steamer to undergo a thorough fumigation with the end in view of a complete extermination of rats.

The Kalibia will be under detention for the remainder of the day, but it is predicted that the vessel will be turned over to the Inter-Island Steam Navigation Company late this evening or early tomorrow morning, and be ready for the discharge of the shipment of 6450 tons Japanese coal.

According to the official log maintained by Captain Stewart, the Kalibia sailing from Norfolk, Va., many months ago, called at Durban, South Africa, thence proceeded to Calcutta, and Bombay, India. From there the freighter visited Singapore and thence to the Japanese ports for coal.

The Federal quarantine authorities at this port have been advised that plague exists in several Far Eastern ports at the present time. Dr. Trotter states that the policy to be pursued will probably call for more or less fumigation of vessels hailing from the Orient, while infectious diseases prevail there.

The Kalibia is a large type of ocean-going tramp, with a length of 410 feet, breadth 50 feet, and depth 31 feet. The vessel was drawing nearly 25 feet of water on entering the harbor this morning.

Two steam rollers and a force of men are making a noise along Queen street like a new pavement. In less than two months the main artery along the local waterfront is predicted to be placed in presentable condition.
